ANDREI CHRISTOPHER M. CARILLO

Web & Software Developer

carilloandrei9264@gmail.com | github.com/carilloandrei9264 | linkedin.com/in/carilloandrei9264

PROFESSIONAL PROFILE

Information Technology student at National University – Laguna and primary backend developer on two full-stack web systems, including one built for Containerboard & Packaging Company (CPC). Experienced in database design, business logic, role-based access control, and real-time features with Laravel, React, and Firebase. Seeking a role as a web or software developer.

TECHNICAL SKILLS

Languages: PHP, SQL, JavaScript, HTML, CSS

Frameworks & Libraries: Laravel 12, Livewire, React, Node.js, Vite, Tailwind CSS, Laravel Reverb/Echo

Databases & Services: MySQL, SQLite, Firebase (Firestore, Authentication, Hosting, Cloud Functions), Cloudinary, REST APIs

Tools: Git & GitHub, GitHub Actions, PHPUnit, ESLint, Figma

PROJECTS

Manufacturing Coordination System — Thesis Project **Jan 2026 – Aug 2026**

Primary Backend Developer *| CPC, Calamba, Laguna | Laravel 12, Livewire, Tailwind CSS, MySQL/SQLite*

GitHub: github.com/AndreiCarillo-9264/manufacturing-coordination-system | *Internal intranet system (no public demo)*

- Built a system unifying 4 departments (sales, production, inventory, logistics) with department-level role-based access.
- Designed the relational schema and service layer for job orders, inventory transfers, finished goods, cycle counts, and delivery schedules, including approval workflows.
- Used queued jobs and events for job-order processing; added real-time updates and notifications via Laravel Reverb/Echo.
- Implemented bulk import/export, 4 PDF report types (inventory, production, deliveries, stock aging), and an audit-trail activity log.
- Used PHPUnit for feature tests covering access control, reports, imports, and real-time broadcasting.

TrustHome PH — Capstone Project **Jul 2026 – Oct 2026**

Primary Backend Developer *| 5-member team | React, Vite, Firebase, Cloudinary*

GitHub: github.com/carilloandrei9264/team-idle | **Live demo:** trusthome-ph.web.app

- Developed the core of a PH rental marketplace with admin-verified listings, bookings, and ratings.
- Built the booking workflow using a per-listing lease and Firestore transactions to prevent double-booking.
- Implemented Firestore/Storage security rules for renter, owner, and admin roles.
- Implemented the trust & fairness score, dispute lifecycle, notifications, owner dashboard, and admin review tools.
- Used GitHub Actions for continuous integration, automatically running unit tests, security-rule tests, lint, and build checks on pushes and pull requests.

NU Queue-It — Web Programming Course Project (v2 Rebuild) **Feb 2025 – Mar 2025 (original)**

Solo Developer (v2) | *Rebuilt as a documented Laravel MVP | Laravel 13, PHP 8.3+, Blade, MySQL/MariaDB, PHPUnit*

GitHub: github.com/carilloandrei9264/university-queue-system | *Local MVP (pilot target: Admission office)*

- Rebuilt an earlier course prototype with role-based accounts (student, staff, admin), department and service management, and daily-resetting ticket numbers.
- Staff call, complete, skip and recall tickets for their own department; students create and cancel tickets; a public display shows the ticket being served; the queue refreshes every five seconds.

CERTIFICATIONS

IT Specialist: Network Security – Certiport, a Pearson VUE Business **May 2026**

IT Specialist: Databases – Certiport, a Pearson VUE Business **March 2025**

EDUCATION

National University – Laguna — Bachelor of Science in Information Technology **2022 – 2027 (Expected)**
